Deprecated: preg_replace(): The /e modifier is deprecated, use preg_replace_callback instead in /home/razltd28/public_html/seo/libraries/joomla/filter/filterinput.php on line **501**

Website hosting is the #2 task for those that want to set up a website:

The first task is to register your domain name. If you have not done this first step yet, no problem, we can do it for you. Just click the Please register my domain name box in the web-hosting form.

The second task is the web hosting, please follow the link to our web hosting form at the bottom of the page, and fill out our web-hosting form to get us to set-up your web hosting. In most cases this process can be completed in 24-hours, and your web address, and email will be active in that time period.

The third task is the website design and development.

- If you have the source files for an existing website, you should be able to ftp those to the website that we set up, and your site should be live right away.
- If you are developing a new site, you can either develop it live in the hosted space, and then publish it when you are ready for the public to view it.
- We also offer a variety of web design services, including affordable do it yourself options with full support from us.

Our regular price for simple web-hosting which include webmail at your domain name is \$25-month (no set-up fees) with a minimum sign-up period of one year. -- Note that we do sometimes make exceptions to the one-year minimum policy.
